Re: Access to Crozier-Nelson Chemical Company
South Cavalcade Site

Dear Ms. Craig:

This letter is to confirm our conversation of August 17, 1987, regarding offsite access. I understand the problems you and your field crew encountered in trying to install the groundwater monitoring well on the Crozier-Nelson property. I do not know why the Crozier-Nelson management is constantly changing their minds, but I do not want this to delay any further progress of the remedial investigation.

Therefore, we will handle this situation in the following manner. First, you will develop a plan to quickly mobilize in the event that access is again granted. In the meanwhile, I will work with the regional counsel to initiate legal proceedings to obtain access. As I explained, this may take some time and result in access after delivery of the RI report. Second, you will examine the areas to the east of Crozier-Nelson, and provide me with recommendations as to alternative sites. Again, the wells on these sites may need to be developed after delivery of the RI report.

Should you have any questions about this issue, please call me at (214) 655-6735.

Sincerely yours,

James F. Pendergast, P.E.
